

**Mid-Semester Evaluation, Department of Geosciences
(to be conducted by the TA and used by the TA)**

Course: _____ **TA:** _____

The Goal is to collect constructive input. You do not need to answer every question, but please answer a few that will help improve the lab/class.

1. The pace of this course is (check one):

____ too slow _____ too fast _____ just right

If you checked either too slow or too fast, what would you like to see changed?

2. Do you generally feel encouraged to ask questions/contribute comments in class?
Why or why not?

3. Would it be useful for the TA to provide additional help outside of the class/lab?
How?

4. How effective are lab presentations (clarity, organization, enthusiasm, etc.)? What could make them better?

5. Is feedback from the instructor sufficient and helpful? What could make them better?

6. What helps you learn in this course?

7. What changes in your study habits have you made to help you learn better?
